## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of incorporation method

- a. sizing dispersion and sizing promoter are added together to the aqueous pulp slurry.
- b. separate addition of the sizing dispersion and sizing promoter.

I. Species of sizing dispersion:

- a. Anionic size dispersion
- b. Cationic. Size dispersion
- c. Anionic size dispersion containing anionic polymer . If this species is elected, an anionic polymer must further be elected from the group listed below under anionic polymer sizing promoter.
- d. Cationic size dispersion containing anionic polymer. If this species is elected, an anionic polymer must be elected from the group listed below under anionic polymer sizing promoter.
- e. Anionic size dispersion containing anionic polymer and cationic polymer. If species is elected, an anionic polymer must be elected from the group listed below under anionic polymer sizing promoter; and a cationic polymer from the group listed below under cationic polymer sizing promoter.

Art Unit: 1731

- f. Cationic size dispersion containing anionic polymer and cationic polymer. If species is elected, an anionic polymer must be elected from the group listed below under anionic polymer sizing promoter; and a cationic polymer from the group listed below under cationic polymer sizing promoter
- II. Further elect one species of cationic polymer component of the sizing promoter:
  - a. one of the cationic polysaccharide listed on page 6 of the specification.
  - b. cationic vinyl polymer
  - c. cationic step growth polymer
- III. One species of anionic polymer sizing promoter:
  - a. anionic naphthalene sulfonate condensation polymer
  - b. anionic polyurethane
  - c. anionic vinyl addition polymer
  - d. one of the anionic polysaccharide listed on page 13 of the instant specification.
  - e. kraft lignin
  - f. lignin copolymerized with formaldehyde
  - g. lignin sulfonate

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1731

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
